Complete Rough-In Package

The ProPlate includes everything you need, when you need it: a versatile mounting/access plate, high-quality valve with brass elbow connection, and protective debris cover.

Finish escutcheons are available separately

Fast, Consistent Rough-ins

Quickly and easily rough in for lavatories, toilets, dishwashers, ice makers, or other appliances. Supply lines can be run from above or below.

Swivel Valve Outlet

Valve outlet can be oriented in any direction, independent of the inlet elbow and incoming supply tube.

Works Inside Cabinets

Escutcheons are designed to thread onto the plate and hold securely – Perfect for interior walls or inside of cabinet-style lavatory fixtures.

Professional-Looking Finish

Pre-colored, white ABS escutcheons can be painted to match any wall color. Install the TrimTite for a more flush appearance.

Mounts On or Between Studs

Fasten the ProPlate directly to studs, or use a bracket to mount between studs. Chrome-plated escutcheons compliment the look of the plated valve.

Optional Extended Valve

The extended 3/8" outlet valve option is great for applications where multiple layers of drywall are used, or when cabinets are furred out from the wall.

Replaceable Valve Design

All ProPlate valves can be replaced with any standard 5/8" OD compression-thread valve.

(see website for valve replacement instructions)

MiniRester™ Option

For applications that require a water hammer arrester, the compression thread MiniRester can be connected directly to the outlet of the ProPlate valve when installing supply tubes.
