

EXPANSION TANK SUPPORT SYSTEM

598 SERIES

TankBracket™

SPECIFICATION

Sioux Chief 598 series TankBracket expansion tank support shall be used where necessary to support thermal expansion tanks (up to 5-gal.) in water supply systems. Support kits shall include a heavy-duty mounting column with slots, a sturdy support base, suspension beam and extension piece (3-pc. model only) and stainless steel securing straps. Support base shall incorporate an elongated opening to allow access for air-charging or for expansion tank to be inverted for installations where tank is above water heater. Side slots in mounting column shall work with securing straps (included) or any water heater restraint straps up to 1.75" wide.

MATERIALS

Bracket components: 18-ga. galvanized steel

Securing straps: 201 stainless steel - 0.50" wide, 4" min - 13" max dia.

SAFE LOAD

75 lbs.

DIMENSIONS

A: Column height	17"
B: Column width	2.75"
C: Column depth	0.75"
D: Base depth	7.5"
E: Base width	2.3"
F: Slot height	1.85"
G: Top to base	12.375", 13.5", 14.625"
H: Beam hook to column ¹	4.5" – 9"
with extension installed ¹	4.5" – 14.5"

1 0.5" increments
